NumPy Exercises - Solutions

Now that we've learned about NumPy let's test your knowledge. We'll start off with a few simple tasks and then you'll be asked some more complicated questions.

IMPORTANT NOTE! Make sure you don't run the cells directly above the example output shown,

otherwise you will end up writing over the example output!

```
1. Import NumPy as np
In [1]: import numpy as np
         2. Create an array of 10 zeros
In [ ]: # CODE HERE
In [2]: # DON'T WRITE HERE
         np.zeros(10)
Out[2]: array([0., 0., 0., 0., 0., 0., 0., 0., 0.])
         3. Create an array of 10 ones
In [ ]:
In [3]: # DON'T WRITE HERE
         np.ones(10)
Out[3]: array([1., 1., 1., 1., 1., 1., 1., 1., 1.])
         4. Create an array of 10 fives
In [ ]:
In [4]: # DON'T WRITE HERE
         np.ones(10) * 5
Out[4]: array([5., 5., 5., 5., 5., 5., 5., 5., 5.])
         5. Create an array of the integers from 10 to 50
In [ ]:
In [5]: # DON'T WRITE HERE
         np.arange(10,51)
Out[5]: array([10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 2
                27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 4
         3,
                44, 45, 46, 47, 48, 49, 50])
         6. Create an array of all the even integers from 10 to 50
In [ ]:
In [6]: # DON'T WRITE HERE
         np.arange(10,51,2)
```

Out[6]: array([10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 4

44, 46, 48, 50])

```
7. Create a 3x3 matrix with values ranging from 0 to 8
```

```
In [ ]:
 In [7]: # DON'T WRITE HERE
           np.arange(9).reshape(3,3)
Out[7]: array([[0, 1, 2], [3, 4, 5],
                    [6, 7, 8]])
           8. Create a 3x3 identity matrix
 In [ ]:
           # DON'T WRITE HERE
 In [8]:
           np.eye(3)
 Out[8]: array([[1., 0., 0.],
                    [0., 1., 0.],
                   [0., 0., 1.]])
           9. Use NumPy to generate a random number between 0 and 1
             NOTE: Your result's value should be different from the one shown below.
 In [ ]:
 In [9]: # DON'T WRITE HERE
           np.random.rand(1)
 Out[9]: array([0.65248055])
           10. Use NumPy to generate an array of 25 random numbers sampled from a standard normal
           distribution
              NOTE: Your result's values should be different from the ones shown below.
 In [ ]:
In [10]: # DON'T WRITE HERE
           np.random.randn(25)
Out[10]: array([ 1.80076712, -1.12375847, -0.98524305, 0.11673573, 1.96346762,
                   1.81378592, -0.33790771, 0.85012656, 0.0100703, -0.91005957, 0.29064366, 0.69906357, 0.1774377, -0.61958694, -0.45498611, -2.0804685, -0.06778549, 1.06403819, 0.4311884, -1.09853837, 1.11980469, -0.48751963, 1.32517611, -0.61775122, -0.00622865])
           11. Create the following matrix:
 In [ ]:
In [11]: # DON'T WRITE HERE
           np.arange(1,101).reshape(10,10) / 100
Out[11]: array([[0.01, 0.02, 0.03, 0.04, 0.05, 0.06, 0.07, 0.08, 0.09, 0.1],
                    [0.11, 0.12, 0.13, 0.14, 0.15, 0.16, 0.17, 0.18, 0.19, 0.2],
                    [0.21, 0.22, 0.23, 0.24, 0.25, 0.26, 0.27, 0.28, 0.29, 0.3],
                   [0.31, 0.32, 0.33, 0.34, 0.35, 0.36, 0.37, 0.38, 0.39, 0.4],
                   [0.41, 0.42, 0.43, 0.44, 0.45, 0.46, 0.47, 0.48, 0.49, 0.5],
                   [0.51, 0.52, 0.53, 0.54, 0.55, 0.56, 0.57, 0.58, 0.59, 0.6],
                   [0.61, 0.62, 0.63, 0.64, 0.65, 0.66, 0.67, 0.68, 0.69, 0.7],
```

[0.71, 0.72, 0.73, 0.74, 0.75, 0.76, 0.77, 0.78, 0.79, 0.8], [0.81, 0.82, 0.83, 0.84, 0.85, 0.86, 0.87, 0.88, 0.89, 0.9], [0.91, 0.92, 0.93, 0.94, 0.95, 0.96, 0.97, 0.98, 0.99, 1.]])

12. Create an array of 20 linearly spaced points between 0 and 1:

Numpy Indexing and Selection

Now you will be given a starting matrix (be sure to run the cell below!), and be asked to replicate the resulting matrix outputs:

13. Write code that reproduces the output shown below.

Be careful not to run the cell immediately above the output, otherwise you won't be able to see the output any more.

14. Write code that reproduces the output shown below.

```
In []:
In [15]: # DON'T WRITE HERE
mat[3,4]
Out[15]: 20
```

15. Write code that reproduces the output shown below.

16. Write code that reproduces the output shown below.

```
In [ ]:
In [17]: # DON'T WRITE HERE
mat[4,:]
Out[17]: array([21, 22, 23, 24, 25])
```

```
17. Write code that reproduces the output shown below.
```

```
In [ ]:
In [18]: # DON'T WRITE HERE
          mat[3:5,:]
Out[18]: array([[16, 17, 18, 19, 20],
                 [21, 22, 23, 24, 25]])
          NumPy Operations
          18. Get the sum of all the values in mat
 In [ ]:
In [19]: # DON'T WRITE HERE
          mat.sum()
Out[19]: 325
          19. Get the standard deviation of the values in mat
In [ ]:
In [20]: # DON'T WRITE HERE
          mat.std()
Out[20]: 7.211102550927978
          20. Get the sum of all the columns in mat
 In [ ]:
In [21]: # DON'T WRITE HERE
          mat.sum(axis=0)
Out[21]: array([55, 60, 65, 70, 75])
```
